Elibrary system

1.user is able to add category,author,publisher,supplier,bookrack,book.

2.unique bookcode is available in the database from ajax.

3.if there are same name of author then unique slug is produced such as admin

admin-1 .

4.user can add multiple authors.

5.user having pdf_1 can read all the books.

Remaining system

1.sorting success function is not working properly but data is saved in the database.

2.borrower history is remained while issuing book.
